

How to Use WinSCP for File Sharing

Step 1: Download WinSCP based on your computer system. To download it, search for “WinSCP download” on the internet, open a trusted link, and scroll down. Then you will find the download link for your version.

Project Activity

Released [/WinSCP/6.3.8/WinSCP-6.3.8-ReadMe.txt](#)

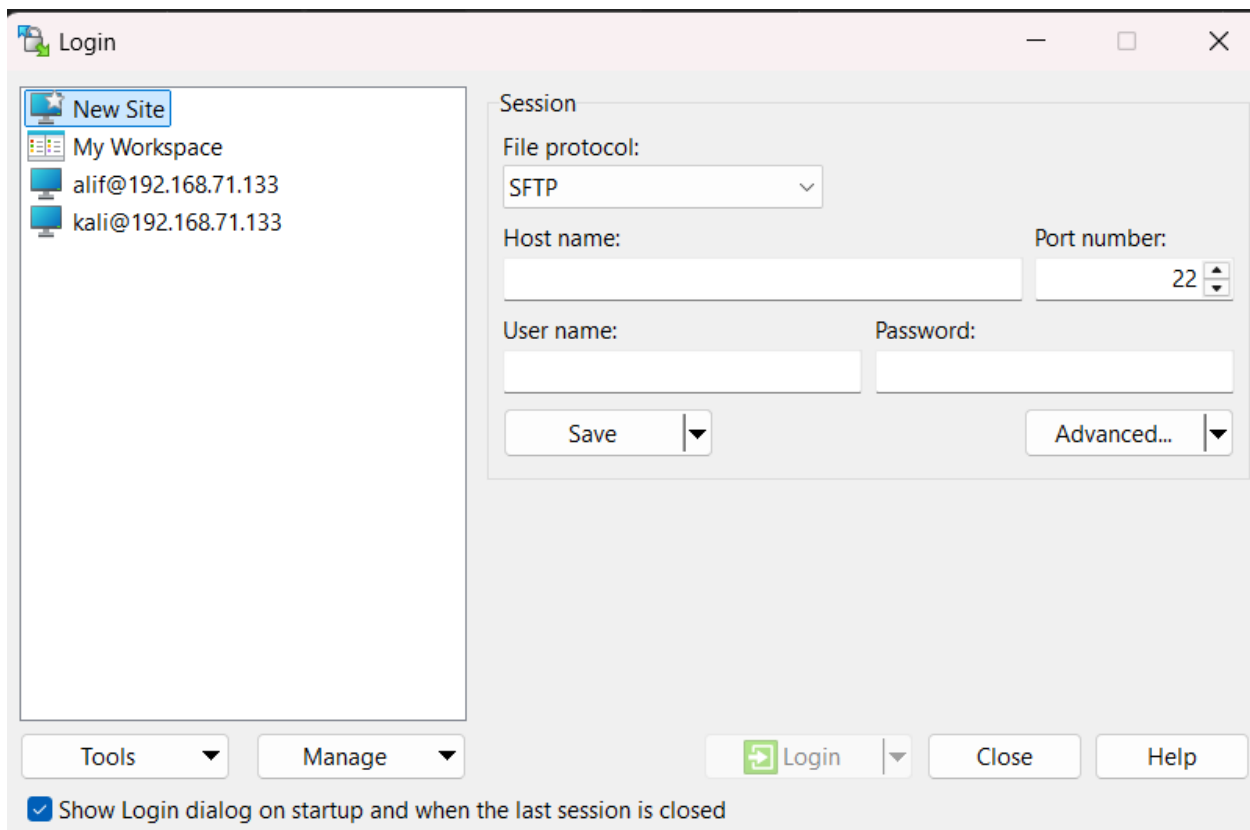

Released [/WinSCP/6.3.8/WinSCP-6.3.8.msi](#)

Released [/WinSCP/6.3.8/WinSCP-6.3.8-Automation.zip](#)

Released [/WinSCP/6.3.8/WinSCP-6.3.8-Setup.exe](#)

Released [/WinSCP/6.3.8/WinSCP-6.3.8-Source.zip](#)

Step 2: After downloading, install WinSCP and open it. You will see an interface like this.

Step 3: To use PuTTY, we need the IP address of the Kali Linux machine. Run the **ifconfig** command in the Kali Linux terminal to find the IP address.

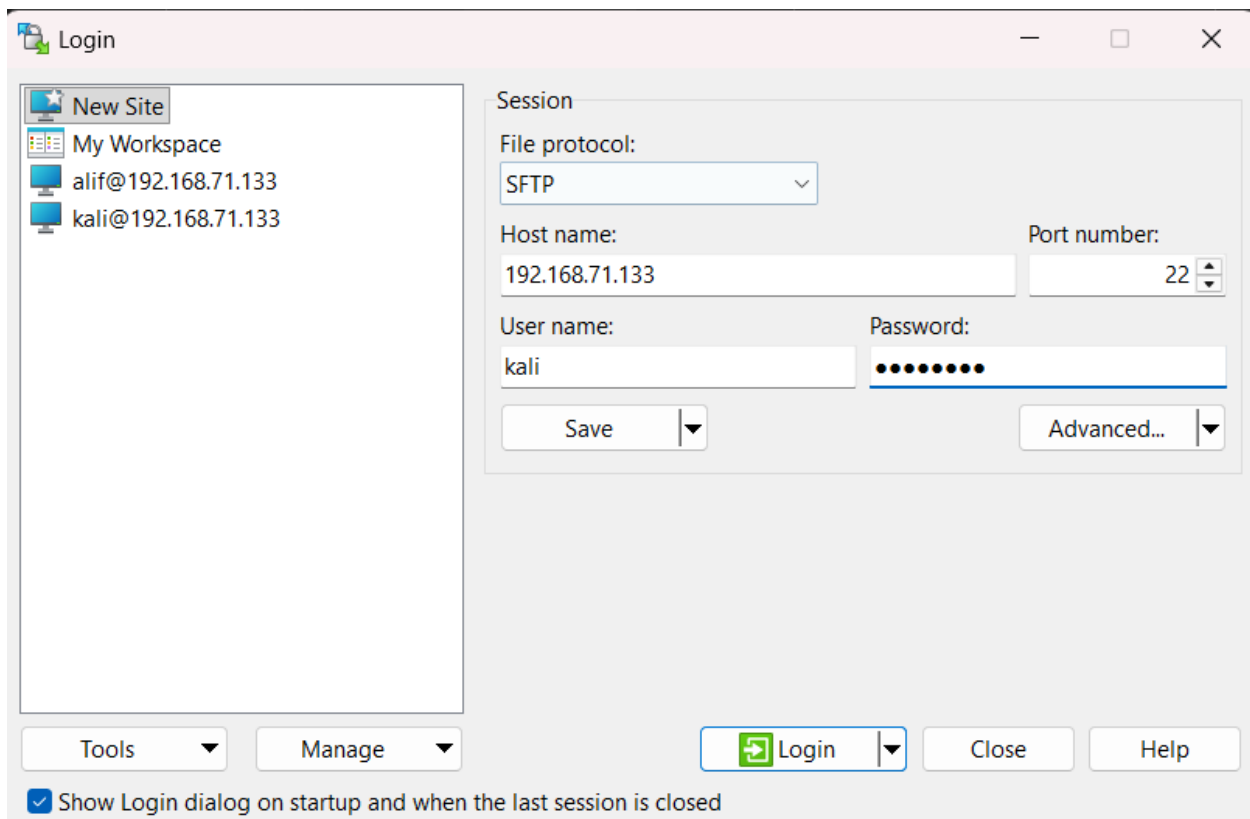

```
(kali㉿kali)-[~]
$ ifconfig
eth0: flags=4163<UP,BROADCAST,RUNNING,MULTICAST> mtu 1500
    inet 192.168.71.133 netmask 255.255.255.0 broadcast 192.168.71.255
    inet6 fe80::53e3:31c5:e14f:b1b3 prefixlen 64 scopeid 0x20<link>
    ether 00:0c:29:a2:01:2d txqueuelen 1000 (Ethernet)
    RX packets 7 bytes 948 (948.0 B)
    RX errors 0 dropped 0 overruns 0 frame 0
    TX packets 31 bytes 3676 (3.5 KiB)
    TX errors 0 dropped 0 overruns 0 carrier 0 collisions 0
```

Step 4: We also need to make sure that the SSH service is running on the Kali Linux machine. Check the SSH service status by running the **service ssh status** command. If the service is disabled or not running, start it by using the **service ssh start** command.

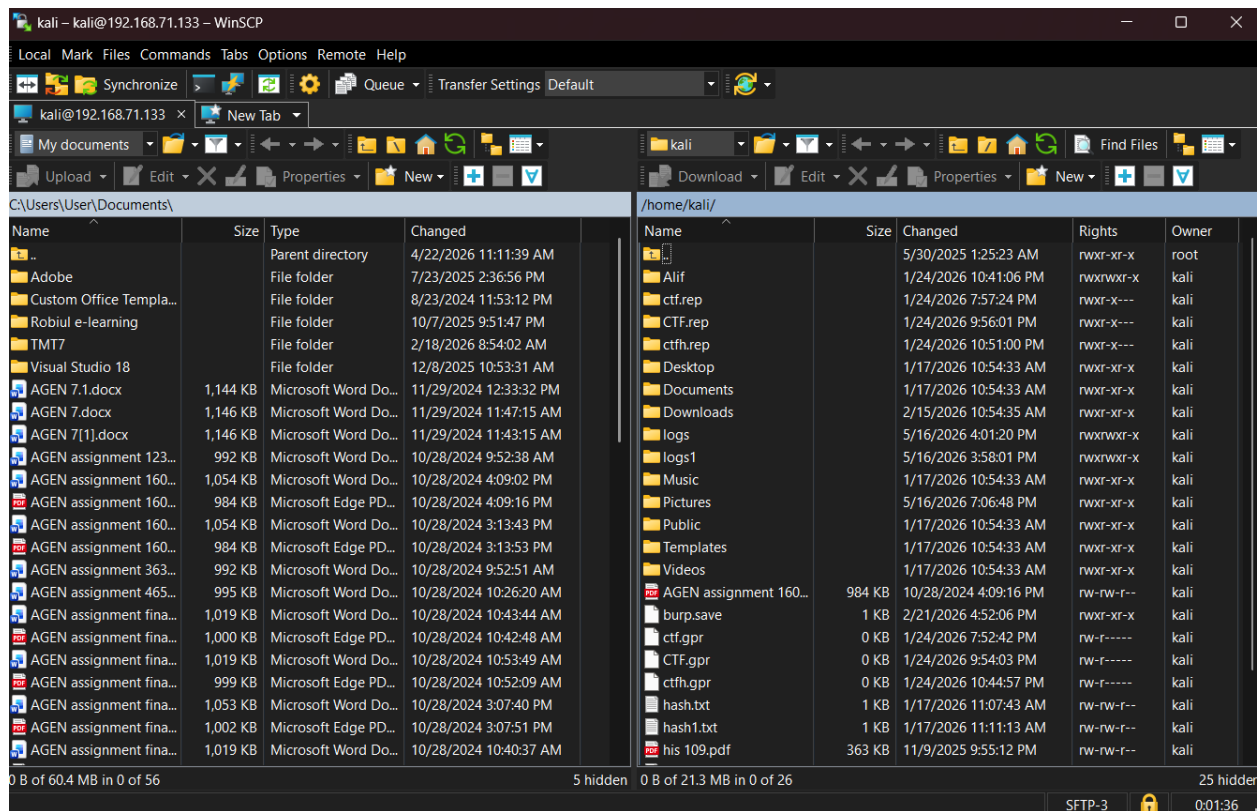

```
(kali㉿kali)-[~]
$ service ssh status
o ssh.service - OpenBSD Secure Shell server
   Loaded: loaded (/usr/lib/systemd/system/ssh.service; disabled; preset: disabled)
   Active: inactive (dead)
     Docs: man:sshd(8)
           man:sshd_config(5)

(kali㉿kali)-[~]
$ service ssh start
```

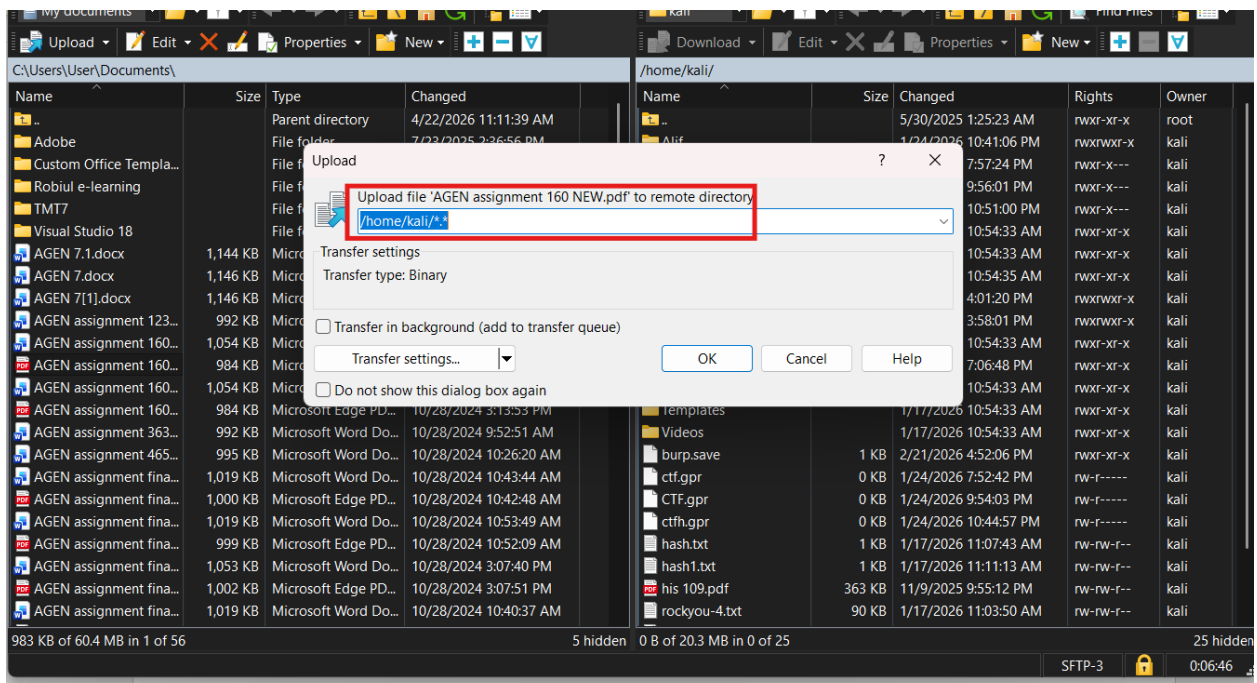

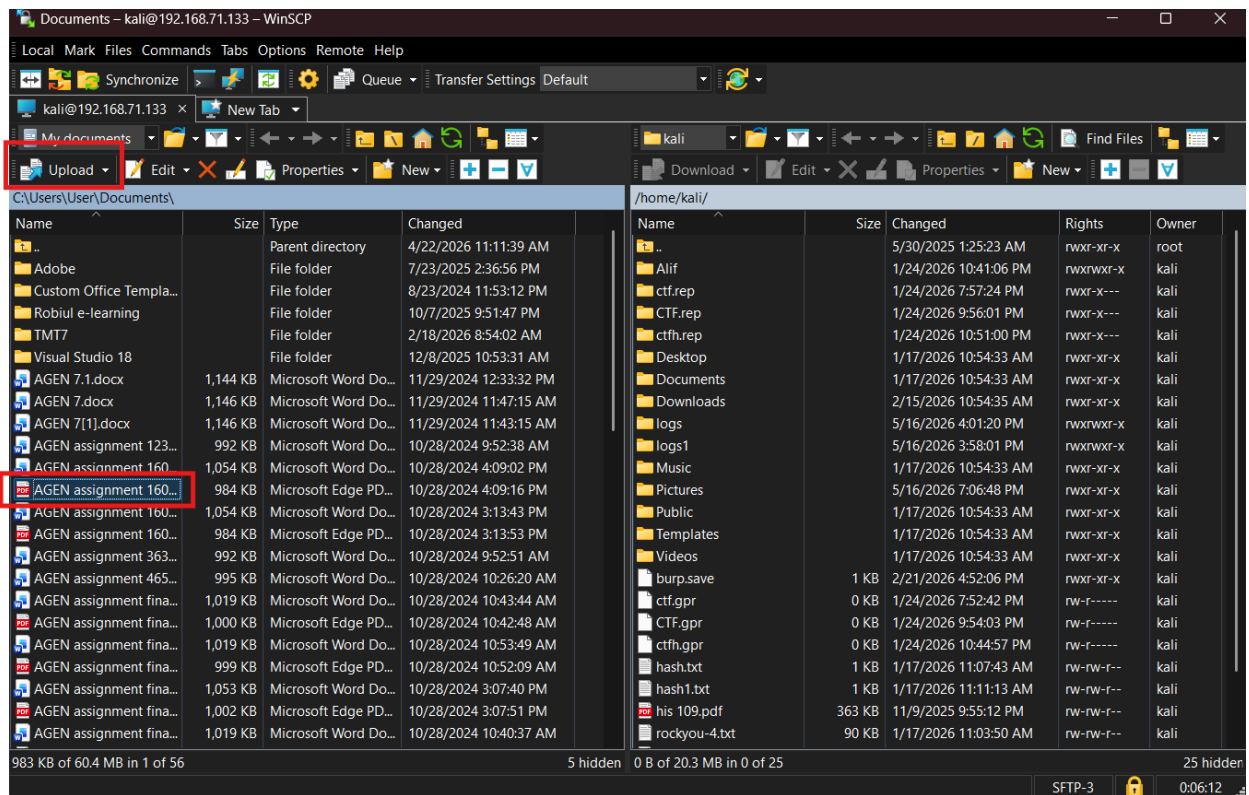

Step 5: After completing these steps, enter the IP address, user name and Password of the Kali Linux machine in the WinSCP interface and start the connection.

Step 6: After that, you will see an interface like this.

Step 7: After that, your Windows machine will be shown on the left side and the Kali Linux machine on the right side. If you want to send a file from Windows to Kali, simply select the file and click on Upload. Then an interface will appear where you can choose the destination folder in the Kali machine. After selecting the destination, the file will be transferred to the Kali Linux system.
